

# MUSIC ACCESS

## MISSION STATEMENT

### Mission Statement

**MUSIC ACCESS**, an **Oasis Voices of Humanity Foundation** program, exists to expand access to music education by placing musical instruments and meaningful music opportunities into the hands of students, schools, and underserved communities where those resources would otherwise be out of reach.

We believe music is not a luxury—it is a powerful tool that builds confidence, inspires creativity, develops discipline, strengthens character, and provides a positive outlet for self-expression and personal growth.

Through our **Music Access** program, we provide instruments, support underfunded school music programs, and create opportunities that remove financial and social barriers to music participation. By working alongside schools, educators, community organizations, donors, and volunteers, we help ensure that every student has the opportunity to experience the lifelong benefits of music.

Our mission is to preserve and expand music education through compassionate support, meaningful partnerships, and practical resources that empower students, strengthen communities, and help keep music alive for future generations.

# WHY WE EXIST

✨ "We're not just a charity—we're a solution." ✨

## Music Changes Lives. Every Child Should Have the Opportunity to Experience It.

Too many students and schools are losing access to music simply because instruments, funding, and resources are out of reach. Budget cuts, aging equipment, and limited community support have left countless young people without the opportunity to discover their musical potential.

We believe music is far more than entertainment. It builds confidence, develops discipline, inspires creativity, encourages teamwork, and gives young people a healthy, positive way to express themselves. The lessons learned through music often extend far beyond the classroom, helping students develop skills that last a lifetime.

That is why **OVH Music Access**, a program of Oasis Voices of Humanity Foundation, exists.

We work to remove financial and resource barriers by helping place musical instruments into the hands of students, supporting underfunded school music programs, and creating opportunities that keep music alive in the communities that need it most.

Whether it's providing an instrument to a student who could never afford one, helping a school replace worn-out equipment, or partnering with donors and community organizations to strengthen music education, our goal is simple:

**To ensure that every student has the opportunity to experience the life-changing power of music.**

This is more than providing instruments.

It's about opening doors.

It's about inspiring dreams.

It's about investing in the next generation of musicians, leaders, educators, and creative thinkers.

Because when we invest in music, we invest in people.

### **Our Vision**

A future where every student—regardless of financial circumstances or zip code—has access to quality music education, the opportunity to learn an instrument, and the encouragement to discover the confidence, creativity, and hope that music can inspire.

**"The world needs more music. Not more noise."**
